

Using the project wiki

On your GitHub repo page, click on the “Wiki” link as shown:

You can add new pages, edit existing pages on this wiki. The wiki can be used to keep your notes here. I have used Textile to edit my wiki – <http://textile.thresholdstate.com/>

I created a new wiki page here – <https://github.com/SMTalim/gittest/wiki/Free-Git-GitHub-Course>

Exercise 5

Create your own wiki page for your GitHub account. You decide what you would like to show on your wiki page, but remember that this would be a public page – viewable by all.
